

AED Repair – Hoist Certification Procedure

You can find the calendar on www.aedrepair.com

- 1) For periodic examination and certification next documents are required to be delivered with each hoist:
 - a. First use examination certificate (Indienststelling verslag)
 - b. CE certificate
 - c. ID plate (including serial number) on the hoist must be readable
- 2) Before the certification can take place we need to inspect the hoist for defects.
This is about half an hour of labor (30€), When defects are found we will make you a quote.
- 3) After inspection the periodic examination and certification can take place:
APVAR0012 HOIST PERIODIC EXAMINATION AND CERTIFICATE (MAX20M CHAIN) 35,00 €*

When you do not have the first use examination certificate we can perform the first use examination and provide the certificate, this includes the periodic examination and certificate.

- CE certificate is required
- ID plate (including serial number) on the hoist must be readable

APVAR0011 HOIST FIRST USE EXAMINATION AND CERTIFICATE (MAX20M CHAIN) 40,00 €*

When you do not have the CE certificate we can recover this from the manufacturer.

For CM this is free, for Verlinde a fee will be applied.

- ID plate (including serial number) on the hoist must be readable

APVER0137 HOIST CE CERTIFICATE (SERIAL NUMBER REQUIRED) 156,31 €

When the serial number and or the identification label is readable but vague we can supply a new:

APVAR0128 MOTOR IDENTIFICATION LABEL 3,58 €

When the serial number and or the identification label is not readable we cannot perform any certification!

When the hoists are ex AED Rent we have all documentation needed.

*This price applies when hoists can be certified in the periodic certifying period at AED BE HQ.

You can find this in the calendar on the AED Repair website

When not, a minimum of 5 hoists is required or a starting fee of 50€

All procedures, quotes and repairs are subject to our general term and conditions that can be found on:
